SUMMARY

Full Stack Software Engineer (in training) — 3rd-year CS student at VIT Bhopal (CGPA: 8.0) with production experience building and deploying scalable web and mobile applications using React, Next.js, Node.js, Flutter, and Firebase. Skilled in REST API design, real-time systems, authentication & authorization, state management, and end-to-end deployment on AWS and Vercel. Certified by Google, Oracle, and NPTEL IIT Ropar.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js 14 (App Router), Flutter, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Django REST Framework, REST API Design, Auth & Authorization (Firebase Auth, JWT, Google OAuth)
- **DB & ML:** Firebase (Firestore, Cloud Functions, FCM), MongoDB, SQLite | TensorFlow, Scikit-learn, Pandas, OpenCV
- **DevOps & Languages:** AWS (EC2, S3), Vercel, Docker, Git, CI/CD, Linux | Java, C++, Python, JavaScript, TypeScript, Dart

PROJECTS

Spendy – Expense Splitting Mobile App [Production APK]

Flutter · Firebase · Dart · Cloud Functions

- Architected a cross-platform bill-splitting app with real-time Firestore sync, Firebase Auth (Google OAuth), FCM push notifications via Cloud Functions, and interactive spending analytics (fl_chart).
- Implemented UPI deep-linking (GPay, PhonePe, Paytm) pre-filling recipient ID and exact amount for one-tap debt settlement; owned full deployment and production release lifecycle.

Collab Sheets – Real-Time Collaborative Spreadsheet [Live]

Next.js 14 · TypeScript · Firebase · Vercel

- Built a multi-user Google Sheets-inspired web app with live presence indicators, Firestore real-time sync, and a custom formula engine featuring dependency graph traversal and circular-dependency detection.
- Optimized rendering via react-window grid virtualization; implemented drag-to-resize, Ctrl+B/I/U shortcuts, CSV/JSON export; deployed on Vercel with GitHub CI/CD — live at spreadsheet-app-ivory.vercel.app.

Customer Churn Prediction System

Python · Scikit-learn · SMOTE · Streamlit

- Built end-to-end ML pipeline on Kaggle Telco dataset (7,043 records); applied SMOTE for class imbalance, engineered features from contract/billing data, deployed Streamlit dashboard with bulk CSV prediction.

EXPERIENCE

Core Member – Design Team, E-Cell VIT Bhopal

Jan 2025 – Present

- Led frontend development and UI/UX design of E-Summit 2025 website (1,000+ attendees); owned deployment, post-launch iteration, and full digital brand identity across channels.

Research Intern & SEO Designer, TheGeostrata — New Delhi (Remote)

Apr 2024 – Oct 2024

- Designed and executed SEO strategy for a geopolitics research platform; tracked organic performance via Google Analytics and Search Console; authored research articles and managed content pipeline.

EDUCATION

VIT Bhopal — B.Tech, Computer Science & Engineering (E-Commerce Technology)

Aug 2023 – May 2027

CGPA: 8.0 / 10

City Montessori School, Lucknow

Completed May 2023

High School: 93.8% | Intermediate: 86.25%

CERTIFICATIONS & HONORS

Google IT Support Professional (Google) • MERN Full Stack (ETHNUS) • Deep Learning – NPTEL IIT Ropar • Oracle Cloud AI Foundations & GenAI Professional • Wipro Earthian Award • Letter of Recommendation – Defense Minister of India
